

PROJECT EXPERT HTML & CSS

AETHER — Digital SaaS Platform

HIGH-FIDELITY DESIGN BRIEF

Gunakan halaman visual berikut sebagai TARGET DESAIN.

Tugas peserta: membangun ulang tampilan dengan HTML5 + CSS3 murni.

WAJIB

- 3 halaman: Home, Platform, Contact
- Flexbox + flex-grow / shrink / basis / wrap
- Media Query dan responsive 320px–1440px
- Form validation tanpa JavaScript
- CSS variables, clamp(), calc(), semantic HTML

DESIGN REQUIREMENTS

Checklist visual yang harus direalisasikan oleh peserta

1

Navbar: desktop horizontal, mobile responsive/vertical sesuai Media Query.

2

Hero: content + dashboard visual menggunakan Flexbox, bukan layout fixed yang rapuh.

3

Cards: mampu wrap dan berubah ukuran mengikuti ruang tersedia.

4

Pricing: PRO lebih menonjol melalui flex sizing, bukan width 150%.

5

Form: field berpasangan horizontal di desktop lalu column pada mobile.

6

FAQ: dapat dibuka/tutup tanpa JavaScript.

7

Mobile 320px: tidak boleh ada content keluar layar dan tidak boleh memakai overflow-x:hidden untuk menutupi masalah.

8

Gunakan semantic HTML, label form, alt image, focus/hover state, CSS variables, clamp(), calc(), dan responsive container.

Semua 36 soal pada dokumen AETHER sebelumnya tetap berlaku; halaman ini memperjelas target visualnya.
